Your career

With access to our vibrant research community and strong industry partnerships, you'll thrive in an innovative learning environment that sets you up for success.

When I look at the best things I got out of Queen Mary, it was starting Too Good To Go and the level of support I received there, so whether that was through award programmes where I met the daughter of Stephen Hawking, or through funding and mentoring, there was an array of support that came through."

Jamie Crummie,
LLM Law; Co-founder at Too Good To Go,
Forbes 30 under 30

Placements

available through our Careers Hub, with access to thousands of external vacancies and graduate schemes

Queen Mary meant so much to me as a research student. My experiences here, and my exceptional supervisors, contributed enormously in preparing me for my career."

Dr Halima Begum,
PhD Political and Human Geography;
Chief Executive at Oxfam UK

I especially enjoyed being part of a group of like-minded people trying to solve world problems. We managed to get to the top 30 finalists among 300,000 competitors in the Hult Prize challenge, representing Queen Mary in what is considered the entrepreneurship Nobel Prize for students."

Marcos Souto Ulloa,
MSc Entrepreneurship and Innovation;
Principal Strategy Consultant at PA Consulting

Our impact

- We discovered two exoplanets, Proxima b and Barnard's star b, broadening our understanding of the universe and its possibilities.
- We uncovered the impact of accent bias on job prospects and social mobility, creating tools to help recruiters reduce discrimination.
- We have empowered young care-experienced people through The Verbatim Formula, using theatre, listening, and dialogue with social workers and universities.
- We have partnered with 100,000 Bangladeshi and Pakistani people in East London Genes & Health to improve health outcomes in underserved communities.
- We have secured £960k in UK government funding to advance wireless technology for space-based solar power, tackling critical global energy challenges.
- We shaped hepatitis C guidelines, driving progress toward eliminating the virus globally.

Accommodation

From postgraduate-only halls to private rentals, you can choose accessible and affordable accommodation to suit your budget and needs.

What's on offer

- Our accommodation is more affordable than the London rent average (StudentCrowd)
- Exclusively postgraduate accommodation in self-catered flats
- Twin rooms and family accommodation available
- Wheelchair-accessible options
- En-suite and non-ensuite rooms
- Costs range between £188 to £430 per week
- 24-hour security team in on-campus accommodation

I loved that it's a campus-based uni. I completed my bachelor's degree in the United States, and Queen Mary replicates the setting of US campuses. It's also in a great location which makes it more affordable while still accessible."

Wellbeing

Achieving your unique potential is our priority. No matter your situation, you'll receive the support you need to succeed.

Support

- Free, specialist, confidential advice and counselling support covering financial, practical, immigration, and wellbeing matters.
- Dedicated events, mixers and wellbeing workshops throughout the year, with Postgraduate reps on hand to support.
- Free, confidential legal support via the Queen Mary Legal Advice Centre.
- Dedicated support, from application thought to graduation, if you're an asylum seeker or refugee, have been in local authority care, are estranged, or you are a carer.
- Disability and Dyslexia support from application through to graduation.

Student Health

- Our Student Health Service on our Mile End campus provides a complete range of medical services.
- Access to Occupational Health support.

Sport

- Inclusive sports options for all skill levels, including social leagues and competitive club sports.
- State-of-the-art Qmotion Fitness Centre.

Safety

- Dedicated Security Service operating 24/7, along with various security measures and resources to ensure a safe campus environment.

Financial support

We are committed to helping you achieve your goals by offering a variety of scholarships, awards and funding opportunities.

- The Global Talent Scholarship is open to international students from a wide range of countries and regions.
- The Alumni Loyalty Award offers £1,000 or a 10% tuition discount, depending on the programme.
- International student support includes funding partnerships with Chevening, the Commonwealth Scholarship Commission, and various governments.
- Fully-funded PhD studentships cover tuition and living costs across all subject areas.
- External funding guidance is available to help students secure additional support.
- Hardship and emergency funding is offered for students facing unexpected financial difficulties.

Accounting, Business Management and Marketing

4th

in London for Accounting
and Finance

(Complete University Guide 2025)

Master cutting-edge business strategies and transformative leadership, driven by a deep commitment to social justice, sustainability, and ethical governance.

I had the opportunity to explore leadership, marketing, entrepreneurship, finance, and strategic management – with some brilliant minds from these fields as teaching staff.”

Chaitrali Bhoi, MSc Management

Whether you’re drawn to the precision of accounting or the entrepreneurial mindset of business management, our interdisciplinary approach encourages you to think beyond textbooks, trends, and formulas.

You’ll be taught by top researchers with diverse expertise and global experience. Rooted in the UN Principles for Responsible Management Education, your learning will be both meaningful and forward-thinking. Situated in the heart of London’s thriving business hub, you’ll be immersed in the energy of the City and Canary Wharf – at the centre of innovation, opportunity, and global impact.

Highlights

- Recent career destinations include Deloitte, HSBC, JP Morgan & Co, KPMG, PwC, S&P Global Ratings, and Unilever.
- Accredited by the Association to Advance Collegiate Schools of Business.
- Athena Swan Bronze Award for gender equality.

AI, Computer and Data Science

Top 100

in the world for Data Science, AI, Computing and Information Systems

(QS World University Rankings by Subject 2025)

Your learning will be shaped by our strong industry connections, so everything you study is practical, relevant and aligned with the latest trends – giving you a real advantage in your career.

My MSc project and modules were instrumental in mastering new technologies. The experience, understanding of key concepts, and exposure to industry practices have been pivotal to my professional growth.”

Uttkarsh Raj, MSc Advanced Computer Science

Transform your passion – whether in software development, machine learning, or data analysis – into real-world impact through our diverse range of specialist and broad postgraduate degrees. You’ll unlock opportunities to collaborate and innovate at the forefront of data science and AI, thanks to Queen Mary’s membership in The Alan Turing Institute’s Turing University Network.

Our investment in state-of-the-art teaching spaces ensures access to the latest technology, while carefully designed electives will enhance your experience. You’ll graduate with the technical skills and leadership capabilities to drive change in high-demand areas like AI, cybersecurity, and data-driven healthcare.

Highlights

- Graduates have gone on to work for companies such as ASOS, Barclays, BBC, BP, Experian, KPMG, Meta Platforms, Microsoft, Sky, and VISA Europe.
- On average, our graduates earn £43,146 just 15 months after graduation (Graduate Outcomes Survey 2021/22).
- 99% of our research is classed as world-leading or internationally excellent (Research Excellence Framework 2021).
- Our Informatics Teaching Laboratory (ITL) is undergoing a £20m refurbishment, due for completion in early 2026.

Biological and Biomedical Sciences

Top 20

in the UK for
Biological Sciences

(QS World University Rankings
by Subject 2025)

Engage in interdisciplinary research and hands-on learning that drive innovation from genetics, ecosystem protection, and healthy ageing.

“

Queen Mary provided me with the tools and freedom to shape my aspirations. Its close-knit community, strong emphasis on networking, and focus on transferable skills helped me grow as a scientist.”

Himmat Bakshi, MSc Biodiversity and Conservation

You'll learn from internationally recognised research leaders, and benefit from world-class teaching and cutting-edge facilities. All of this will equip you with the knowledge and skills to tackle some of the world's most pressing health challenges and drive innovations that shape the future of medicine, biodiversity, and sustainability.

With strong ties to industry partners and top companies, you will gain valuable opportunities for collaboration and career growth. Plus, international fieldwork opportunities will transform your academic experience into a real-world adventure in ecological research.

Highlights

- Close links with exciting industry partners, including AstraZeneca, the Environment Agency, GSK, the Institute of Zoology, the Natural History Museum, Proctor & Gamble, and Royal Botanic Gardens, Kew.
- Opportunities for interdisciplinary research in biology, psychology, and biochemistry.
- Fieldwork in Madagascar for ecological programmes.

Cancer and Surgical skills

Top 10

in the UK for Medicine

(QS World University Rankings
by Subject 2025)

Stand at the forefront of medical research and clinical practice, where your discoveries and innovations will make a lasting impact on global cancer care.

The MSc programme itself, and the publication from it, helped me secure my preferred jobs for my junior doctor training posts. These achievements will also help me to stand out down the line.”

Danielle Hilton, MSc Cancer and Molecular Pathology and Genomics

Learn from leading experts who are at the frontline of medical education and research, as you tackle health challenges that impact both local and global communities. With our high-quality, modern training, you'll gain the skills and knowledge to make a real-world impact on pressing healthcare issues affecting millions.

Focused on cutting-edge research and treatment strategies, including molecular oncology and clinical trials, these programmes will enable you to advance your career and contribute to groundbreaking innovations in cancer care and healthcare overall.

Highlights

- Our graduates have gone to work in roles such as biomedical support workers, clinical trials assistants, doctors, lecturers, research coordinators, and scientists.
- Recent career destinations include AbbVie, AstraZeneca, MAC Clinical Research, NHS, and University of Cambridge.
- Taught by experts from Barts Cancer Institute, a Cancer Research UK Centre of Excellence and part of the Cancer Research UK City of London Centre.

Chemical Sciences

93%

of our graduates are in work or further study 15 months after graduation

(Graduate Outcomes Survey 2021/22)

Learn from leading academics whose groundbreaking research spans diverse fields, from AI applications in chemistry to innovative cancer treatments and low-carbon energy solutions.

“

I really enjoyed how the programme is very lab-intensive, as I wanted to pursue a career in scientific research. I liked being embedded within an interdisciplinary research group to contribute to a better understanding of science.”

Harriet Judah, MSc Chemical Research

With access to cutting-edge facilities, including advanced laboratories and dedicated postgraduate spaces, you'll be empowered to explore new frontiers in learning and research. Our supportive environment, complete with dedicated study areas, ensures you have everything you need to fully immerse yourself in your academic journey.

Upon graduation, you will be equipped not only with the skills and knowledge to excel in the chemical sciences sector, but also with the confidence to drive innovation and make a lasting global impact.

Highlights

- Generous funding available for postgraduate students, including the Global Talent Scholarship worth up to £5,000 in 2025.
- Research projects tailored to students' interests, spanning a wide array of fields.
- Access to state-of-the-art instrumentation and industry standard software for real-world experience.
- Our graduates have gone on to become IBM technology consultants, nanotechnology scientists, and won places on the Operational Leadership Graduate Scheme at Engie.
- Industry links to global organisations including AstraZeneca, GSK, Pfizer, and Syngenta.

Dentistry

1st

in London for Dentistry

(The Guardian University
Guide 2025)

Develop advanced skills
in the UK's leading dental
training facilities, helping
you take your career to
the next level and shape
the future of oral health.

The programme offered strong theoretical and practical training, linking materials science to clinical dentistry. The inclusive environment, advanced labs, and research resources enriched my experience."

Nasser Alangary, MSc Dental Materials

You will be guided by world-leading experts across a diverse range of specialisms, including oral medicine, orthodontics, periodontology, and dental public health, ensuring that your education is not only comprehensive but also aligned with your unique career aspirations.

Studying in one of the UK's most dynamic and diverse dental communities, you will gain invaluable hands-on experience in your chosen area. With access to modern clinical practice facilities in the state-of-the-art Institute of Dentistry building, you'll receive practical training at a renowned Institute, equipping you to excel in any professional setting.

Highlights

- 15th in the world for Dentistry (QS World University Rankings by Subject 2025).
- A wide range of clinical and non-clinical programmes with opportunities for distance learning.
- Some of the most advanced and modern equipment in the world, including the Simodontic Haptics Dental Trainers.
- New postgraduate study and research facilities are available in the state-of-the-art Blizard Building, as well as the Institute of Dentistry.

See related courses on pages 69–70.

programmes**

Economics and Finance

Top 100

in the world for Economics and Econometrics

(QS World University Rankings by Subject 2025)

Immerse yourself in a dynamic learning environment where theory blends with practice, empowering you with the expertise to thrive in a fast-paced industry.

Queen Mary stood out as one of the UK's top institutions. What sold me were the cutting-edge facilities like the trading lab equipped with the Bloomberg Terminal, and exclusive networking events with top UK employers."

Jason Know, MSc Wealth Management

By blending academic theory with real-world examples, you'll cultivate the analytical skills and strategic thinking essential for tackling complex financial challenges. With a strong focus on employability, you'll learn from leading academics at the forefront of cutting-edge research and experienced industry professionals – bridging the gap between advanced theory and real-world application.

Located in the heart of a global financial hub, just moments from the City and Canary Wharf, you'll have direct access to industry leaders and unmatched networking opportunities. As a graduate, you'll be fully equipped with the skills, knowledge and experiences necessary to thrive in careers in banking, consulting, government, and beyond.

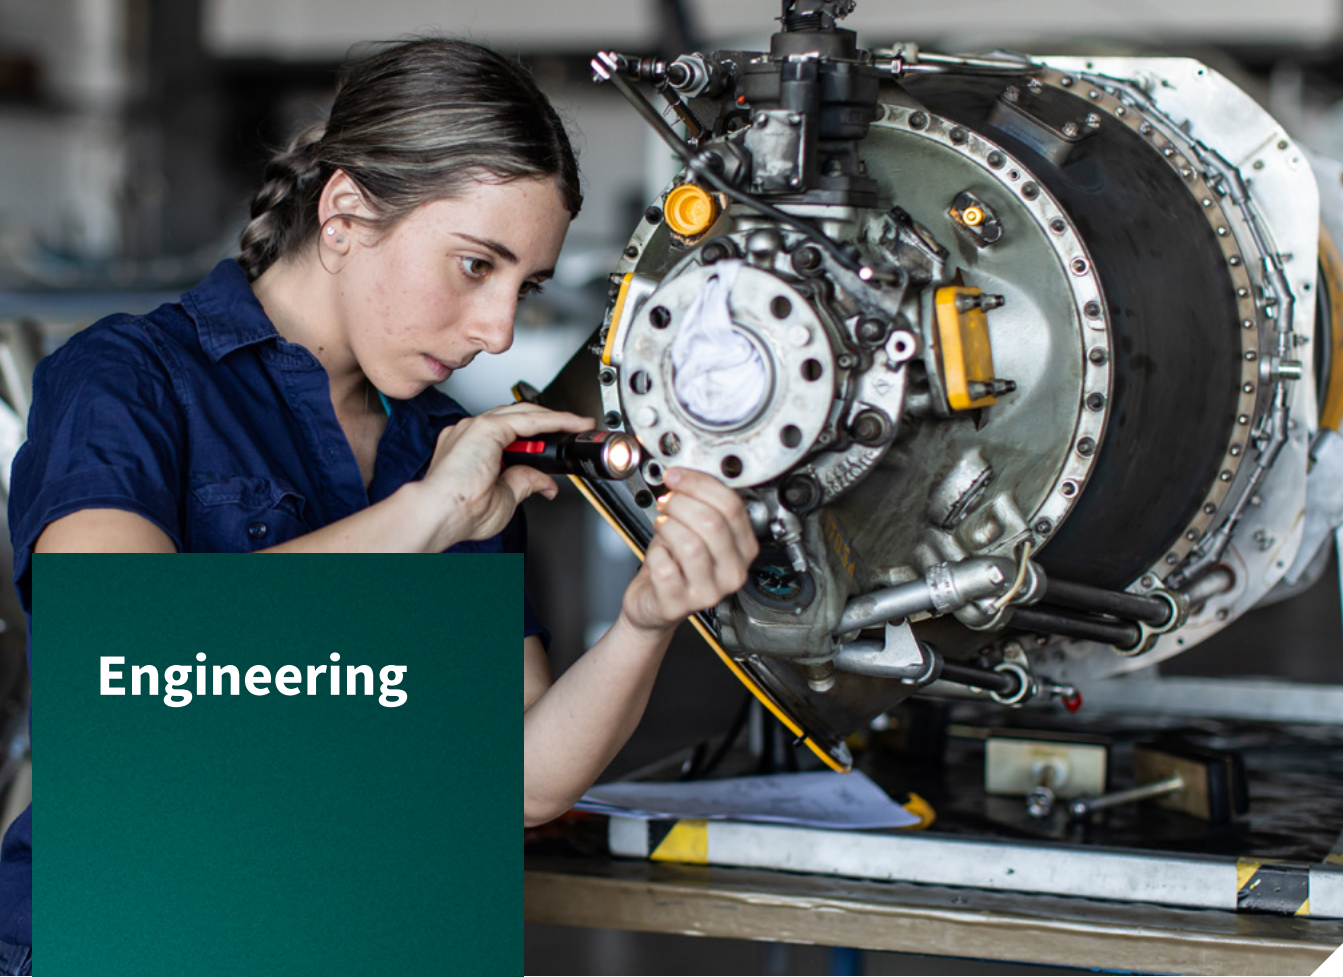

Highlights

- 90% of our graduates are in work or further study 15 months after graduation (Graduate Outcomes Survey 2021/22).
- Strong ties to professional practice through affiliation with professional organisations such as the Chartered Financial Analyst Institute.
- Trading Lab with 37 Bloomberg Terminals and access to key economic and financial data such as Wharton Research Data Services and The Economist to support your studies.

See related courses on pages 70–71.

months after graduation

(Graduate Outcomes Survey
2021/22)

Join a diverse, forward-
thinking community where
unique perspectives and
problem-based learning
prepare you to thrive in
tomorrow's world.

“

While the programme was intensive and challenging, the professors and tutors were supportive and knowledgeable, providing us with the necessary resources to succeed.”

Mohmad Azim Master, Advanced Robotics MSc

Study with an award-winning academic team driving revolutionary advancements in medical robotics, pre-clinical drug testing, sustainable materials, and renewable energy. With £30m already invested in cutting-edge engineering facilities – and further investment planned – you'll have access to world-class resources that empower your learning and set you up for future success.

You'll also have regular opportunities to engage in site visits, guest lectures, careers fairs, and workshops, bridging the gap between theory and practice while expanding your professional network.

Highlights

- Our graduates have gone on to create impactful solutions, like designing affordable period underwear for the humanitarian sector and inventing electricity-free washing machines.
- Our programmes are informed by close employer links and input from our Industrial Advisory Board, with members from NASA, Airbus, BT Group, Ford, Rolls-Royce, Pfizer, and more.
- A wide range of engineering facilities, including high and low-speed wind tunnels, cell and tissue engineering labs, computational modelling facilities, the Makerspace, the Medical Electronics Facility, and the NanoVision Centre.

Medicine

7th

in the world for research
citations in Medicine
(citations per paper)

(QS World University
Rankings 2025)

Learn from world-leading
experts in medical research
and contribute to solving
some of the world's most
pressing health challenges to
improve the lives of millions.

“

Thanks to my degree, I learned so much about caring for children, from newborns to young adults, and gained valuable skills and knowledge that have helped me develop my role as a Senior Assistant in the emergency department.”

Holly Wakefield, MSc Paediatric Emergency Medicine

Choose from a wide range of programmes designed to meet the evolving demands of global healthcare and accelerate your career across diverse medical fields. Whether you study on campus or online, you'll benefit from expert-led teaching across the full spectrum of medical and related disciplines. Supported by our specialist Institutes, you'll have access to collaborative research opportunities, cutting-edge facilities and a welcoming academic community.

Our programmes equip you with the knowledge, skills and professional connections to transform lives, whether in forensic medical science, genomic or regenerative medicine, or focused areas such as aesthetic medicine, endocrinology, emergency and trauma care, and critical care.

Highlights

- Fast-track your career via our Clinical Doctorates in Medicine and Surgery, which deliver specialised pathways, flexible learning and high-quality hands-on placements with our partner NHS Trusts.
- Access to specialist medical libraries at Whitechapel and West Smithfield (site of Barts Health NHS Trust), open-plan research laboratories, and multi-user labs with equipment and CCTV for practical classes.
- Recent graduates are employed in roles in the medical, health, and life sciences sectors, for charities, NGOs, and in government, while some have gone on to further study.

Physics and Astronomy

Top 20

in the UK for Physics and Astronomy

(QS World University Rankings by Subject 2025)

With over 100 years of pioneering research and international collaboration, you'll gain a world-class education alongside leading scientists, supported by major grants and strong industry partnerships.

“

Studying at Queen Mary really taught me how to go about learning. I enjoy taking new concepts, breaking them down, researching, and reading up where needed to understand something new.”

Bradley Cooper-Barnard, MSc Astrophysics

Join a department with a rich legacy of scientific breakthroughs, from the Nobel Prize-winning work on the Higgs boson to the discovery of the exoplanet Proxima b. Here, you'll work alongside world-leading scientists in cutting-edge facilities, pushing the boundaries of knowledge in fields like astronomy, theoretical physics, artificial intelligence, and machine learning – through hands-on, high-impact research.

Through close industry connections, cross-disciplinary collaboration, and involvement in prestigious global projects, you'll gain the expertise, experience and confidence to lead innovation in both academic and applied science – and help shape the future of physics.

Highlights

- 95% of our postgraduate students are in employment or further study 15 months after graduating (Graduate Outcomes Survey 2021).
- Our MSc and PhD programmes are supported by European Research Council grants, and offer students opportunities to engage in applied and fundamental research.
- Access to facilities that have undergone £105m of investment in the last five years including our observatory and our teaching laboratories, which host X-ray sources, spectral emission tubes, radioactive sources and detectors, and open-source electronics hardware.

Politics and International Relations

Top 10

in the UK for Politics

(QS World University Rankings by Subject 2025)

Learn from world-renowned experts to sharpen your research skills, think critically, and develop a unique perspective on the forces shaping global and local politics.

My programme enabled me to draw connections between business issues in regard to supply chain management, policymaking, and multilateral governance on global traded commodities.”

Olivia C, MSc International Business and Politics

Gain a competitive edge in a dynamic research environment that tackles global challenges. You'll explore international relations from a critical perspective, examining key topics like “American power”, the Global South, and the intersection of development and security. This analytical approach will prepare you to address public policy at local, European, and global contexts.

Supported by academics with strong policy links, you'll apply theory to real-world challenges, including those in your own country. Practical workshops in core academic skills will equip you for success, while Queen Mary's central London location offers direct access to seminars and events at the heart of policymaking.

Highlights

- Access to one-to-one academic guidance, tailored workshops, and external guest speakers on topics such as careers in public affairs and working in Parliament.
- Close links to our Mile End Institute, bringing together a wide range of policymakers, politicians and thinkers, providing engagement and networking opportunities.
- Our graduates have gone on to work in roles such as project coordinators, freelance journalists, account executives, plan and policy analysts, student affairs managers, finance inspectors, and researchers.

A photograph of two individuals in a modern, brightly lit interior. On the left, a Black woman with short grey hair, wearing a white shirt and a green lanyard, is looking towards the right. On the right, a young woman with dark hair in a high bun, wearing a blue and white jacket and large hoop earrings, is looking back at her. They appear to be in a casual conversation.

Psychology and Mental Health

96%

of our graduates are in work or further study 15 months after graduation

(Graduate Outcomes Survey 2021/22)

Join a new generation of mental health professionals shaping the future of care through science, compassion, and discovery.

“

My favourite module, Mental Health in Context, introduces fascinating research and broadens my understanding of mental health. Queen Mary stood out as a Russell Group University with strong rankings, and its NHS links have been invaluable.”

Tanya Dutt, MSc Psychology: Mental Health Sciences

Explore the science and treatment of mental health disorders through programmes that combine clinical practice with leading research into therapies and public health. Designed for recent graduates and professionals, our courses offer an in-depth look at behavioural psychology and the complex factors shaping human experience.

We offer a range of diverse and career-focused programmes – including specialist degrees in Creative Arts and Mental Health, Forensic Psychology and Public Mental Health. Some programmes are also available online, providing the flexibility to study in a way that suits you.

Highlights

- Our MSc Psychology (Conversion) and MSc Forensic Psychology and Mental Health are accredited by the British Psychological Society, allowing a smoother pathway towards many professional careers in psychology.
- Our graduates have gone on to work as assistant psychologists, advocates, clinical associates in psychology, and mental health workers.

How to apply

Please apply as early as possible to allow enough time for your application to be considered, particularly if you're applying for sponsorships or financial support.

International students

- Our Global Engagement team travels to over 50 countries each year to meet and support our international applicants.
- We have an international network of over 100 authorised representatives who can provide advice and guidance on your application to Queen Mary.

Conversion programmes

- LLB Senior Status – qualifying law degree suitable for non-law graduates
- MSc Artificial Intelligence
- MSc Computer Science
- MSc Data Science and Artificial Intelligence
- MSc Biomedical Engineering
- MSc Psychology

Fast-track programmes

- Our Graduate Entry Medicine MBBS (four years) is designed to be a fast-track route for graduates who obtained good degrees in science or health-related subjects.

Postgraduate Research programmes

- Find a good match with a supervisor or existing research group – most Schools advise that you contact a supervisor via email before applying.
- Explore research areas and supervisors on our Postgraduate Research webpage, and for entry requirements and application forms, visit Applying for a PhD.

information

Terms and conditions

Queen Mary has made reasonable efforts to ensure that the information provided in this prospectus is both helpful and accurate at the time of going to print. However, it is important to understand that there are circumstances in which we may subsequently change aspects of a programme.

Our programmes are delivered within a dynamic, academic community by staff who are actively engaged in research. In this context, we might make changes so that our students can learn from the latest academic research. We also value student feedback and provide regular opportunities for our students to comment on the content of their programme. We may therefore alter a programme in response to this dialogue with current students.

For this reason, it is important that you check our website for the most up-to-date information (qmul.ac.uk/courses) or contact us using the details contained within this document.

Any place at Queen Mary is subject to Queen Mary's terms and conditions, which can be found at qmul.ac.uk/prospective/termsandconditions. These cover a range of topics that are important for you to know. Before accepting any offer from Queen Mary, please make sure you read our terms and conditions in full, and contact Queen Mary if you have any questions or concerns.

Queen Mary will receive personal data from you in various ways when you submit your application for one of our programmes, which may include special category or criminal convictions data.

Any personal data will be held by Queen Mary and may be used by Queen Mary to enable it to fulfil its responsibilities to you.

Our London campuses

① Mile End campus
Home to our Faculties of Humanities and Social Sciences, and Science and Engineering. It offers facilities geared towards an exceptional learning experience including lecture theatres, a library, cafés, state-of-the-art sport facility, and our canalside. Student accommodation is on campus, so you have everything you need on your doorstep.

- ☐ Mile End station
- ☐ Stepney Green station

② Whitechapel campus
Situated alongside The Royal London Hospital and The Royal London Dental Hospital premises, it's home to world-class biomedical research laboratories, our medical library, a café, student accommodation, and teaching facilities.

- ☐ Whitechapel station

③ Charterhouse Square campus
Home to the medical research headquarters and a hall of residence for our medical students.

- ☐ Barbican station
- ☐ Farringdon station

④ Lincoln's Inn Fields campus
Home to the Centre for Commercial Law Studies, our postgraduate teaching and research centre for law is located in the heart of legal London.

- ☐ Holborn station

⑤ West Smithfield campus
Home to medical and dental postgraduate and research students, as well as our cardiovascular, cancer, epidemiology, and public health research facilities.

- ☐ Barbican station
- ☐ Farringdon station

“

The best thing about studying at Queen Mary in London is that learning goes far beyond the classroom. With its buzzing culture, world-class museums, and position as a global finance hub, the city offers lessons and opportunities at every turn.”

Lavanya Tatiwala,
MSc Marketing and Digital
Communications

We are accountants, computer scientists, biomedical researchers, clinical trial assistants, lab managers, video editors, oral health researchers, economists, engineers, environmental coordinators, teaching associates, archivists, consultants, barristers, journalists, data analysts, doctors, astrophysicists, public affairs officers, and mental health workers.

Made Different.
