1. Apologies	
2022.16	As above
1.1 Declaration	ns of Interest
2022.17	There were no declarations of interest
2. Environme	ntal Audit Action Log & Matters Arising
2022.18	The Head of Sustainability stated that we are using the audit to assess our
	performance against our environmental objectives as well as the standard
	regulations. Three external environmental certification audits and three internal
	environmental audits have been conducted across our operations.
	External EcoCampus environmental management system (EMS) Certification Audits
	Queen Mary met the EMS criteria associated with all the Bronze, Silver and
	Gold EcoCampus' EMS certification requirements.

Internal Environmental Audits  Clinical waste storage and non-hazardous waste management are two areas that require improvement. We have delivered waste management training to over 80% of our Facility Management staff.  The Head of Sustainability proposed that we should take an action regarding the storage of clinical waste bins (Mile End campus) because the location of these bins is readily accessible by members of the public, visitors, staff and students.  RR suggested that the clinical waste storage locations at the Whitechapel should also be investigated  PT to arrange a meeting with GW and the Health and Safety Team to address the storage of clinical waste bins on the Mile End campus.  PT to arrange a meeting with SB, RB, and RR to address the storage of clinical waste bins on the Whitechapel campus.  PT to upload all Committee papers via the MS Team channel.  3. Environmental Sustainability Action Plan (ESAP)  3a. 2020/21 Annual Environmental Sustainability Report  The Head of Sustainability gave an overview of the Annual Environmental Sustainability Report. This report highlights of our performance during the 2020/21 academic year were:  Our 2020/21 business travel carbon footprint reduced by 96% compared to our 2018/19 baseline (because of the pandemic)  We recorded a 39.8% reduction (from 345,588 m³ to 208,032 m³) in water used across our residential and non-residential buildings  Construction and refurbishment: We secured an investment of £152,692 to		
storage of clinical waste bins (Mile End campus) because the location of these bins is readily accessible by members of the public, visitors, staff and students.  RR suggested that the clinical waste storage locations at the Whitechapel should also be investigated  ACTION  PT to arrange a meeting with GW and the Health and Safety Team to address the storage of clinical waste bins on the Mile End campus. 4d.	Emergency Preparedness and Response Procedure
2022.25	PM gave an overview of the Emergency Preparedness and Response Procedure
	and suggested three areas for improvement:
	To link the actual document to the procedure (e.g., the Incident Management Plan)

	The Incident Management Plan creates a framework for the response, but the
	first responders must be adequately trained to manage emergency
	environmental emergencies
	Proactive engagement with this procedure with a new member of staff
OUTCOME	The Emergency Preparedness and Response Procedure was approved and the
	three agreed actions for improvement included in the action log of the environmental
	management system (EMS) annual review.
ACTION	PG to include a reference of the emergency preparedness and response EMS
	procedure in the Incident Management Plan.
ACTION	PG to liaise with relevant leads to ensure that their teams are adequately trained to
	manage relevant environmental emergencies and incidents.
ACTION	PT to ensure that new staff with assigned responsibilities within the procedure are

2022.26	PM suggested area for improvement in the procedure:
	To move the testing of the operational effectiveness of the response to a spill
	incident to the Health and Safety Directorate.
OUTCOME	The Emergency Spill Response Procedure was approved.
ACTION	The Health and Safety Directorate to monitor and record periodic emergency spill
	response drills.
ACTION	PT to upload the approved procedure on the MS Team Channel.
4f.	Emission to Air Management Procedure
2022.27	PM gave an overview of the Emission to Air Management Procedure and suggested
	one area for improvement:
	To carry out periodic monitoring of the documentation and compliance related
	to the air conditioning and refrigeration equipment, boilers, and fume
	cupboards.
OUTCOME	GW to provide assurance that periodic air emissions associated with F-GAS and
	HVAC are monitored, documented and reported.

2022.33	The Head of Sustainability gave an overview of the Log of Interested Parties.
2022.33	
	This register captures our relevant stakeholders, interested parties, partners and
	regulators. This register ensures that our environmental engagement,
	communication, and compliance strategies are fit for purpose to enable us to achieve
	our environmental objectives.
	The Head of Sustainability stated that we have included Malta Campus.
	Malta has a different business model compared to the UK campus, so they include
	that as one aspect as well as recommendations from the Bronze audit scope and
	contents register.
5c.	Scope and Context Register
2022.34	The Head of Sustainability gave an overview of the Scope and Context Register.
	This register captures all our activities and processes that may have positive or
	negative environmental impacts. This register underpins our environmental aspects
	register and environmental compliance registers. This register is also currently being
	used to gain insight into environmental risks and opportunities associated with our
	operations.
	Activities and processes in buildings were included to the Environmental Scope and
